

Sprint 2 Retrospective

Team 2

After the sprint review, our group gathered to discuss the workflow in Sprint 2, the issues we faced and the goals we achieved. Below is a summary of our meeting.

What worked well this sprint that we want to continue doing?

- our project meetings became more productive as we spent more time working on the actual tasks;
- we continued our practice of working and meeting beyond the allocated project hours;
- our Trello board was used more efficiently compared to sprint 1 as we stored more of the team's ideas, questions, responsibilities and issues there;
- we were able to make the project tasks more independent to avoid codependency issue in this sprint (mainly due to the fact that the activities for the project became more versatile giving us more freedom to manage them);
- we learned to give better feedback on each other's work (more specific and well-thought).

What didn't work well this sprint that we should stop doing?

- we should stop not informing the other team members about important matters (absence during the meeting, inability to meet a deadline etc.)

What should we start doing or improve?

- we should still discuss each other's work progress more and in greater detail;
- we should try to maintain closer communication between team members than we did in sprint 2;
- we should start developing test cases for our project;
- we should try to always stick to the agreed deadlines. If it is not possible, other team members must be notified about the issue in advance.
